Controller instruction

- 1. Height adjustable function**
Press the "▲" or "▼" button to adjust the height. The LED display shows the current height.
- 2. Childproof lock**
Press and hold the "▲" and "▼" buttons for more than 5 seconds at the same time to set the child lock. After the setting is successful, the LED will display "Loc". At this time, all buttons operations are invalid. You can press the "▲" and "▼" buttons at the same time for 5 seconds to cancel the lock state, when the hand control display changes from "Loc" to normal digital display, it means the system has been unlocked.
- 3. Reset function**
When the table is at the lowest position, press and hold „▼” for more than 5 seconds until the display show „rst”. After the reset is completed, the display will show the lowest height number.
- 4. Anti-collision system**
The frame is equipped with an anti-collision system. Upon encountering an obstacle, the frame will stop and start moving in the opposite direction.
- 5. Over heating protection**
Display shows "hot", indicating the desk is running frequently, and the motor is over heating, so the system stop operation at once for 18 minutes rest in order to avoid the damage of motor.

Rozwiązywanie problemów

Pressing the up or down button has no response	Check whether the wire connection is normal Try to reset the operation
Slow rise speed	Check whether it is overloaded
